HEAVY DUTY CRANE & SERVICE BODIES

A product of the USA
CRANE & SERVICE BODIES

Designed and manufactured to withstand the harshest environments and most demanding field applications while providing you with the highest quality, most user-friendly, versatile, functional and safe body available. Our heavy duty Master Mechanic™ crane and service bodies keep tools, materials, parts and equipment organized for field service, installation and maintenance work of all types.

SERVICE BODIES:
MM100
MM200
MM200HD
MM300HD

CRANE BODIES:
MM112

The design is the result of over 40 years of custom body building experience coupled with valuable input from the end-user community and our loyal customer base. They include more standard features and benefits than our competitor’s standard production bodies.

MASTER MECHANIC™ SERIES

STANDARD FEATURES

1 Integrated Drip Rails
True integrated drip rail that channels water away from the surface of the body, unlike drip guttering which overfills.

2 External LED Work Lights
High quality exterior LED lights offer 360° rotation on the base and the head of the light giving you maximum visibility.

3 Infinitely Adjustable Shelving
Shelving built on uni-strut channel mounts giving the user the control to put the shelves where they want them. They’re not pre-slotted like the majority of the bodies in the market.

4 Internal Hidden Hinges
Reading’s Master Mechanic™ hidden hinges are mechanically affixed to the door frame for ease of replacement, creating true flush fit doors and weather-proof seal.

5 Compression Handles
Our compression handles allow fully-gloved hand operation and ergonomic design for ease of operation. *Appearance may vary.

6 Redi-Safe Non-Skid Surfaces
Offers excellent grip, even when wet or soiled. It’s applied to the entire bed, tops of all compartments and walking surfaces of the bumper.

7 Full-Width Crossmembers
Full-width crossmembers, as well as substructure reinforcement between the crossmembers, offer unsurpassed strength.

8 Automotive Grade Undercoating
True automotive grade rubberized undercoating is applied to the entire underside of the body and bumper.

9 Treadplate Overlay
The front and top of our bodies are reinforced with treadplate overlay, giving them a better defense against road debris and everyday use in the field.

10 Welding Lip On Bumper
Our bumpers come standard with a clamping lip for your welding projects and it won’t catch fire in welding environments.

11 Integrated Tie-Downs
Fully integrated tie-down pockets in bed of body. Four tie-downs standard on the 1xx bodies, six on the 2xx & 3xx series bodies. Located below the surface of the bed, making entire bed space available.

12 LED Compartment Lights
Dome-style LED lighting located on ceiling of each compartment, except compartments equipped with OA brackets.

* Shown with optional equipment.
